To whom it may concern,

Egle Eitmantyte was a student in the pediatric course, nursing care of children, from January 2021 to May 2021 at Brookdale Community College. I am the lead professor for the Pediatric Content. In addition, I have worked with Egle during her final clinical rotation during her graduating semester, managing and coordinating nursing care, adults.

During this time, Egle was consistently highly engaged and demonstrated excellence. She is a serious student demonstrating critical thinking skills, application of theory, assessment skills and evidence-based practice while providing care to patients. She demonstrated safety with pediatric and adult safe medication dosages and bedside skills. If Egle had a question or wanted clarification, she sought guidance appropriately. She is an innate leader and was exemplary. This was recognized by faculty and her peers.

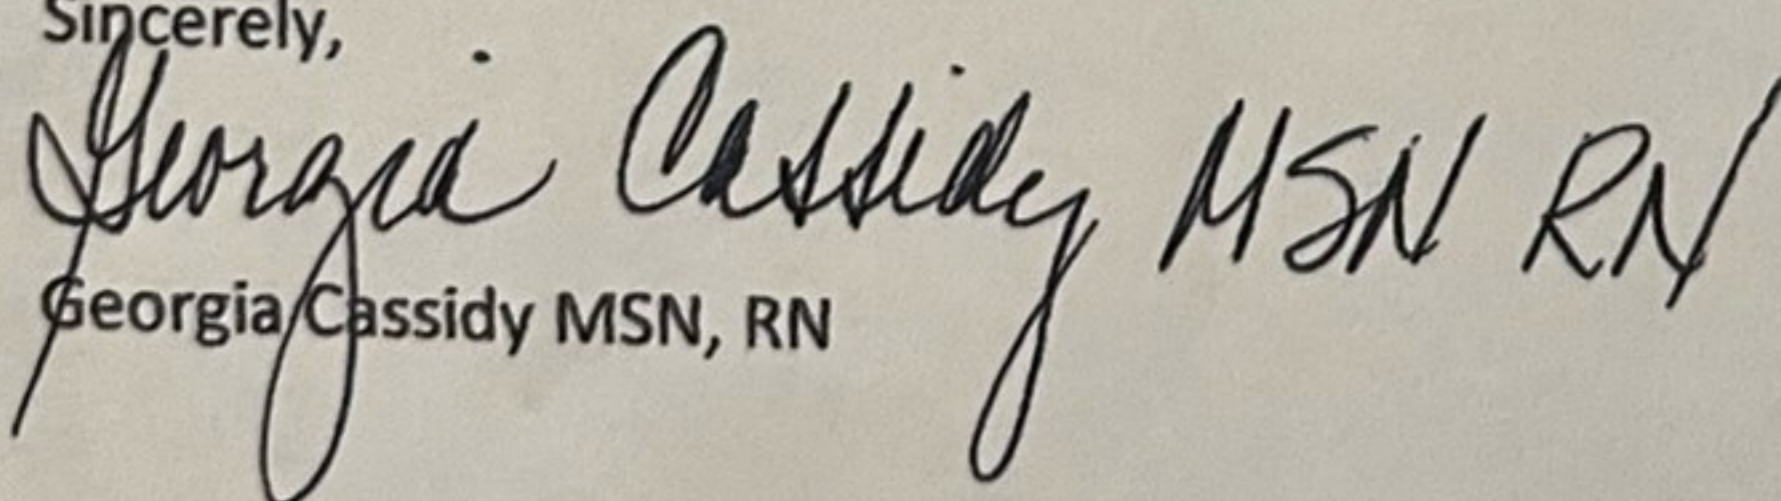

Egle submitted all assignments timely. She was detailed and her submissions demonstrated application of nursing science with appropriate rationale and mindfulness. She is always patient focused and empathetic while maintaining professionalism. In addition, Egle was supportive of her peers and encouraging when she recognized someone needed a hand.

Egle will be an asset to the nursing profession as she demonstrates the values and ethics of nursing, application of theory and science and strives to provide safe care. As she ventures out into her nursing career as a new graduate, I wish her much professional success. It would be to her advantage to continue gaining and refining nursing skills as well as eventually working towards national certification in the specialty she may choose and advanced academic endeavors.

If I may be of any further assistance or provide you with any further information, please do not hesitate to contact me.

Thank you.

Sincerely,

Georgia Cassidy MSN, RN
